Improving Organizations Improving Lives

## STAT OF THE WEEK

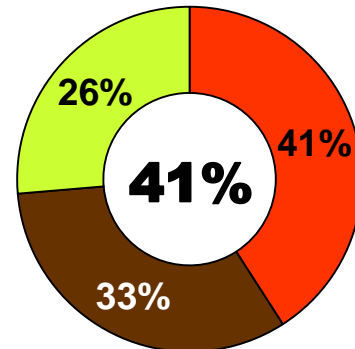

### Supervisor/ & Manager/Employee Relations in T&T

**66%** of employees say they get along well with their immediate supervisor, but only **41%** say they get along well with their managers.

My immediate supervisor and employees get along well in my department/work unit.

In my view, managers and employees get along well in my company.

**These results show that employees get along better with their immediate supervisors than with their managers. But statistical analysis of our survey data suggests that management/employee relations are a much better predictor of employee engagement than supervision. How do managers and employees get along in your organization?**
